Hello people,

My name is Joenio Costa, I'm from Brazil. I'm a software engineering, and now I'm in the last year of my master degree. My work is focused on software tools and your paper below is one of my sources:

"Recovering the Memory Behavior of Executable Programs"

The paper states that some information about the MSP tool can be found at the following address:

<http://icps.u-strasbg.fr/software/msp>

But, when I try this URL I've got a redirect message, can you help me to get the source-code of this tool?

Thanks!
