Hello people,

My name is Joenio Costa, I'm from Brazil. I'm a software engineering, and now I'm in the last year of my master degree. My work is focused on software tools and your paper below is one of my sources:

"A CASE Tool Platform: Using an XML Representation of Java Source Code"

The paper states that the documentation of the Sapid/XML tool can be found at the following address:

<http://www.jtool.org>

But I cant found any information about the tool there, can you help me to find the source-code of the tool?

Thanks!
